SuitCase Application Android App | Android Studio

-

Created a basic suitcase/travel management app to help users organize travel items.

-

Implemented navigation and basic UI components using Android Studio.

MealMate Android App | Android Studio

- Built a user-friendly food management app to track and explore meal options.
- Focused on layout design, intent navigation, and feature structure.

Login & Signup System Cybersecurity Concept

- Developed a login/signup interface with input validation and simple security logic.
- Introduced users to basic security features like password rules and form protection.

Assignment helper

- Developed a full-stack web application that allows students to upload assignments, track progress, and receive updates, with a secure admin panel for managing users and assignment statuses.
- Implemented authentication, file upload handling, and email notifications (using PHPMailer), ensuring a user-friendly and efficient academic support system.
